TABLESS CELL TECHNOLOGY

HIKOKI continues to lead the way in MULTI VOLT battery technology with a powerful new tabless 21700 lithium-ion battery cell.

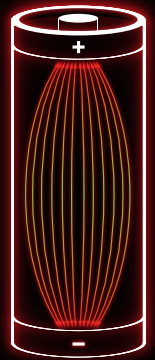

The HIKOKI T-PWR Tabless Battery (BSL3640MVT) has been built with less internal resistance allowing for more power to flow from the tabless battery to the power tool increasing both the overload capacity and tool speed.

This diagram shows the difference between HIKOKI's new T-PWR tabless cell vs a conventional cell. The power of the conventional cell gets bottlenecked at a single positive and negative tab while the tabless cell delivers free-flowing power with low resistance.

18V 450g Grease Gun Kit

AL18DA(GRZ)

- Variable flow dial with 10 pre-set discharge pressure settings
- 690 bar max. discharge pressure
- 3-way filling system
- Lock-on trigger
- Two-mode operation (High/Low)

Supplied with 1x1080W battery, charger, case.

Barrel Capacity	450g
Flow Rate	High: 297mL / Low: 115mL
Max. Pressure	69/41MPa
Speed Modes	2 Modes

Torque Boost Technology

TORQUE BOOST TECHNOLOGY

New Torque Boost Technology combines precision, power and speed for the perfect smooth cut every time even under heavy load.

Torque Boost Technology combined with the Smart Auto Switch Mode automatically adjusts no-load speed and torque depending on the load and application. Auto Switch Mode automatically adjusts no load speed between 6,000rpm (High Speed Cutting) and 4,500rpm (High Torque) achieving high speed cutting and high efficiency improving productivity.
